

Advanced Institute of Education has itself gone through several transformations, infrastructural and otherwise, ever since it was established in 2007.

It is imperative for the youth to be responsible, confident and self motivated to be able to meet global challenges .The institute imparts value based, world class education for making a positive contribution towards society and nation and provide opportunity for inculcating values. The institute is distinct in its hands on approach to training and applying theory to practice. The faculty focuses on authentic teaching practices and internship and creating a truly reflective teacher. The oneness of knowledge is very effectively practiced. The institute makes an effort to provide a holistic experience to its students in the form of skill enrichment programs like guest lectures, conferences and capacity building workshops which add value to the grooming professionals /teachers who serves as a valuable resource for the society. During internship, student-teachers explore with different strategies of teaching putting into practice all that they learn in theory papers. The feedback provided to them builds up on the theories and principles already taught to them by helping in better assimilation. As a result, by the end of the course, they develop abilities to reflect on different aspects. The college focused on the capacity building of the teachers by providing them resources and guidance for writing and publishing their research papers and to attend faculty development programs to update their knowledge and practice in teaching and learning. The institute completely focuses on imparting the quality education and for that workshop and seminars were held for development of self of students as well as teachers in preparing the better citizens if the society. Students were made aware towards their health, hygiene and environment so that they could be a health and balanced personality to serve the society and nation. To assess the quality in learning continuous feedback is done annually to improve the process of teaching and learning, educational technology was incorporated in all the aspects of work. Freshers were made techno-friendly by imparting training sessions on ICT. Therefore, institute worked on improving the quality of stake holders and education to attain its vision and mission.
